After show report IBMS Con- gress 2022

**14 - 17
March 2022**

IBMS Congress 2022

Slee exhibits together with Solmedia in Birmingham, UK.

Slee is excited to be back on the Island after several years!

Impressive building, nice setup, great atmosphere! It was a real pleasure to be back in UK in 2022.

Slee and Solmedia: a perfect match in terms of diagnostics.

Get it all from a single source in the UK! Best products, service and customer management. Slee is German engineering partnering with Solmedia to supply a dynamic range of laboratory equipment. Click here to visit our partner [Solmedia](#)

Alexander Benjamin:
"Good to be here."

„Mr. Benjamin, what was your personal impression of the fair?“

It was so impressive to have more than 600 important interested persons passing our booth during these 3 days! The people were really captivated by Slee and Solmedia. About all visitors claimed they could feel the Slee quality compared to competitors.

Ergotec: ergonomic
worktable

CUT 6062:
fully-automatic
precision microtome

„Mr. Benjamin, can you tell what attracted people the most?“

The **Ergotec** was really the whole show's highlight and an actual stroll stopper. People were so excited to see something like this for the first time, they almost went crazy. It really overwhelmed me: People were coming to our booth informed by other people just to see the **Ergotec** working table!

„What did you tell people the most during the fair?“

Actually I offered them to have a seat at the **Ergotec**. They had the chance to sit down and experience the great synergy between the table and the **CUT 6062** microtome. Many of the interested persons were really excited how well it all fit together. Of course the **CUT 6062** plays in its own league. Being placed on the **Ergotec** makes this an outstanding setup!

Live on the booth: CUT 6062

The fully-automatic precision microtome **CUT 6062** is designed for all applications in routine, research or industry. Years of experience and customer input have contributed to create one of the best fully-automatic microtomes available.
